

England's Mercury,
OR, AN
EPHEMERIS

For the Year of Christ 1690.

Being the Second after *Bissextile* or *Leap-year*
and from the *Creation*, according to Scripture, 5639.

CONTAINING

The *Longitude*, *Latitude*, and *Aspects* of the
Planets; a *New Table* of *Houses*, (never before published,) *Astrological Observations*, *Eclipses*, *Lunations*,
Tides, *Terms*, *Rising* and *Setting* of the *Sun* and *Moon*,
and variety of other matter, befitting such a subject,
nor in any other extant.

FITTED TO

The *Meridian* of the *August City* of *London*,
whose *Latitude* is 51 deg. 32 min. and *Longitude* 24
deg. 20 min.

By *John Wallis*, Esq; Student in *Physick*, *Astrology*, and
other parts of the *Mathematicks*.

Hence haste, my Babe; go, tell Teague to his fate,
And Mounſieur when he muſt complete his race:
Fear no one's anger, but where e'er thou come,
Proclaim aloud the fate of Chriſtendom.
Though Eighty Eight and Eighty nine are gone,
Yet Europe's ſorrows are but coming on;
Sickneſs and Famine firſt muſt have a place,
As well as Sword, this ſinfull Stage to grace.

L O N D O N,

Printed by *W.H.* for the Company of Stationers. 1690.

To the Right Honourable

DANIEL
EARL of *NOTTINGHAM*,
Baron *Finch* of *Daventry*, One of
the Lords of Their Majesties most
Honourable Privy Council, and
Principal Secretary of State, &c.

Although it is yet within Memory; since no less than
King Charles the Second, was pleased to vouchsafe
Protection to such a Subject as this, and that from thence,
and your Lordship's Innate Goodness, (which every where
proclaims it self far beyond the Ability of a much abler Pen
than mine,) I might be encouraged to doe the like; yet, My
Lord, It is not that that makes me presume to profane your
Honourable Name here, but for want of better opportunity,
like a Drowning Man, griping at the least that seem to
vouchsafe him the least relief, embrace this to make my pub-
lick and thankfull Acknowledgments, for the favour which, at
the request of the Honourable Doctor George, your Lord-
ship was in July last pleased to vouchsafe to

My Lord,

Your Lordship's most Humble,
Obedient, and Thankfull Servant,

John Whalley.

To the READER.

Courteous Reader,

Although this be the first I have had the Happiness to present to this my Native Country, yet I am not wholly a stranger to Subjects of this nature; but sojourning in Ireland these eight years last past, did for every of the seven last there publish something of this nature, which always met with such kind reception from those of the British Nation there, that I make no doubt of the like favour for this here; and therefore could wave all intreaties to that purpose, and indeed, had not troubled you with an Epistle, only to pray you to be so kind, if perchance you espie any oversights, to pardon these my first faults, and do promise you to take more care for the future; but this I cannot excuse, not having time enough so much as to review it, or indeed, scarce to write this excuse for it, being commanded in haste to their Majesties Service, which allows me not even one hours time farther, much less what the correcting of this would require; and the great and hasty preparations daily making for that Expedition, and the obligation of a promise I lay under to finish this before I went, made me run the whole Subject over in such haste, that I cannot promise it to be so well done as I could wish, and should have endeavoured to make it, if time had given leave. And besides, being in the crowd of poor, miserable, and distressed Protestants, hurried in haste from the now Deplorable Kingdom of Ireland in April last, had not time and opportunity to bring any Books with me for England, or by reason of my preparations to return thither again, to get any here that might be helpfull to me in composing this only an Ephemeris: However, I make no doubt but Time, the Touchstone of all things, will prove it as usefull and agreeable to Truth, as most of it's kind you will meet with, being built upon the same foundation with my former, which I suppose some of you, to whose hands this may come, do remember, even from the very first, to point at the since past, and present Revolutions of Europe, and particularly and plainly those of these Kingdoms, long before thought on, of which I have neither time or room to enlarge farther upon here; therefore conclude,

Kind Countrymen, yours
and Urania's Servant,

Chester, Die)
Aug. 12th, 1689.

Fohn Whalley

A Table of the *Kings* and *Queen's* that govern'd
England, since it was first so called by *King Egbert*, untill 1690.

That I may do all men justice, and avoid being accused of theit, be pleased to take notice that this *Ephemeris*, was borrowed from Mr. *Gadbury's*, which by the effects thence observed, I conclude agreeable to truth as any other Extant, and by allowing one min. to the ☉'s place, and 13 or 14 min. to the ☾'s, is fitted to *Dublin*.

June hath xxx days

Month days.	Week days.	Fest. days Weather, Mut. Asp.	the D's place. G.S. M.	Monthly Observations.	From Acquaintance
1	e	S. p. East.	4 22	All the planets except Saturn	11
2	f	Ter. End.	5 5	changing their signs the last	12
3	g	△ h 1d	6 19	month, with the Square of Jupiter	13
4	a	Cold	7 1	to Venus and Mercury, from the	14
5	b	windy, and	8 14	beginning of Cardinal signs, shows	15
6	c	△ h 8	9 27	the game of out and in, now be-	16
7	d	showry,	10 9	come a play again, to turn knives	17
8	e	Whit. S.	11 21	out, and just men in. In short it is	18
9	f	△ 4 δ	12 3	time of great alteration, and I	19
10	g	but more	13 15	hope for the better, I mean in	20
11	a	S. Barn.	14 27	Offices, Employments, and places	21
12	b	hot and	15 9	of Honour and Trust, perhaps it	22
13	c	pleasant;	16 21	is another Restoration of Persons	23
14	d	sultry,	17 3	duly qualified, Charters, and	24
15	e	Trinity S.	18 15	the like, to this Antient State; it	25
16	f	hot, and	19 27	looks like some such business. Ju-	26
17	g	□ ○ 4	20 9	piter and Mercury are the prin-	27
18	a	thunder,	21 22	cipal concern'd; and they signifie	28
19	b	□ h δ	22 5	Places, Persons, and things of	29
20	c	Ter. beg.	23 18	that Nature: And the Square of	30
21	d	△ ○ h 21	24 1	Sol and Jupiter now, and of	
22	e	2 p. Trin.	25 16	Mars and Saturn, brings late Of-	
23	f	δ ♀ ♀	26 0	fenders of that kind to Justice.	
24	g	St. Barn.	27 15	The work is so general that even	
25	a	inclined to	28 1	Petty-Coats are not exempted,	
26	b	hail, or	29 16	and, if I guess right, it principally	
27	c	rain, sud-	1 1	relates to Ireland.	
28	d	den show-	2 16		
29	e	S. Pet. Pa.	3 0		
30	f	□ h ♀ers.	4 14		

First Quarter the 3 day 28 min. past 7 in the aftern.
 Full moon the 11 day 8 min. past 6 in the aftern.
 Last Quarter the 19 day 46 min. past 5 in the aftern.
 New moon the 26 day 46 min. past 8 in the morn.

June, 1692.

1	Lathmas	7 14 m 52	<p><i>Certainly the continued Series of Malevolent Aspects to Saturn in Square to the great Conjunction, cannot but approve of prodigious, mischievous Consequences, as well to Fra. as the Papists of Ireland, and that too as well at Sea as Land; especially, the two past Months and this; for it points particularly at both. And indeed, in general, they signify great Fights and Slaughters, both by Sea and Land; Robbing, plundering, Murders and such other Destructive ones to be expected, but above all, the Square of h & s in June is worst, and threatens the Miseries before-mentioned.</i></p>	11

October hath xxxi days.

Month Days.	Week Days.	Fest. days, weather, mit. Asp.	Moons age.	Moons place. g. s. m.	Monthly Observations.	From Account.
1	a	Warm and	9	0 41	Whether upon Account of some late Discoveries, or otherwise, this Month proves uneasy to many, who lately thought themselves secure, and prefers others more worthy the Business; it is very general, and about some Writing, Message, or Treacherous Ambassy. The Friendly Trine of ♃ & ♀ gives the happy News of the Surrender of some Hold or Possession of great Consequence, and safe return of Merchants Ships, but the untoward Opposition of ♃ to ☉, at his Ingress into ♋, and the Conjunction of ☉ & ♀, most part of the last and this Month, keeps things in an untoward state, and causes great Debates about Regulating or new Modelling the Government of some foreign Nation or Nations, and gives Trouble and Travel to some late Rulers therein, and to Governours, Majestries, and Persons of Honour: Perhaps Informations given against them for past Miscarriages. Orange Water is the only Cordial now in Europe.	11

November hath xxx days.

Month Days.	Week Days.	Fest. days, weather, mut. Asp.	Moons place. g. f. m.	Monthly Observations	Rom. Account
1	A	All Saints.	10 15 X 6	<p>Consideration being had to the present posture of Affairs, things seems now in a very hopeful State, Souldiers & harrased Fleets retreating into Winter Quarters and Harbours, and Ambassadors are sent from one Prince & Court to another, and many hopeful endeavours are used to heal the bleeding Wounds of the sickly World, and for the present, will obtain very hopeful appearance, but as yet, will not receive their desired issue; for Mars not yet sufficiently glutted with Blood, having first consulted crafty Mercury, once more in Scorpio Accosts old Saturn, and thereby, destroys all those friendly endeavours, at least for the present. However, as yet things seem carry'd on with a fair hand, while at the same timethere lies a Snake in the Grass, contriving how to ruin & destroy some Great Person; but Mars is his Friend, and being strong in his own House, delivers them to his mercy: And besides, the Design is too late to hurt.</p>	11

Matters at the beginning of this, stand much after the same State they did the last and, besides, what is there mentioned, gives Honours and Preferments of several kinds, and all things seem flowing in a Stream, or rather a Flood of Comforts, but, indeed, the World, as yet, falls far short of so great Blessings: For, just as ☉ enter ♍, ♀ salutes him with a Square, and at the following Lunation. ♄ with the like; and sois from Cardinal points, which fails not to demonstrate, that things are not yet arrived at that Perfection, which lately was about this time expected, and so give not only an unhappy Conclusion to this, but a like Beginning to the next Year. The season is not fit for Action, and yet things begin to be carryed on with great Violence, for an early Martial Harvest. In the mean time, some finds Leisure to accuse others, and kick them out of their Places; yea, even some of the long Robe falls by the Stratagem.

Full Moon 6 day 4 minutes before 1 in the Morning.
Last Quarter 12 day 27 minutes past 5 in the Evening.
New Moon 20 day 46 minutes past 2 in the Afternoon.
First Quarter 28 day 26 minutes past 5 in the Evening.

December, 1690.

The

The Use of the foregoing Table.

Note, That the Table is divided into ten Columns, and so noted with great Figures in the middle, as 1, 2, &c. All which I shall explain by Examples as follows.

Example 1. To find the Moons rising and setting, the 16th day of March this year, I turn to March, and right against the 16th day, which is Sunday, in the fourth Column toward the right in the left-hand Page, I find the Moon to be 16 days old; with this 16, the Moons Age, I enter the first Column of the Table, noted with the Figure 1, and just at the bottom I find that 16, and right against it in the second Column 11 hours 12 minutes, (the time of the Moons shining), and the same day of the month I find the Sun riseth 5 1 min. after 5, and sets 5 1 min. before 7, viz. 9 min. after 6. Now because she decreaseth, I subtract her shining from the time of Sun-rising, (by adding 12 hours, because Subtraction cannot otherwise be made), and the remainder is 6 hours 39 min. the time of the Moons rising, that is, 39 min past 6 at night: So likewise by subtracting the Moons shining after the same manner from Sun-setting, gives her setting.

Examp. 2. To find the Moons setting, and hour of the night, the 11th of March, I find the Moon by the same Rule to be 11 days old, and right against that her Age, I find in the second Column towards the left-hand 8 hours 48 min. for the time of her Southing; then repairing to a Sun-Dial, I find the shadow a quarter of an hour past the stroke of 10; so that it wants 1 h. 45 m. of the stroke of 12, which I subtract from 8 h. 48 m. the time of the Moons Southing, and the remainder is 7 h. 3 m. the true time of the night; If it had been past 12, I must have added.

Examp. 3. To find the time of High-water at Holyhead, March 3, when the Moon is 23 days old: With this 23 (the Moons Age) I enter the third Column of the Table, and from thence direct my eye along towards the right-hand till I come to the ninth Column, under Holyhead, &c. where I find 3 h. 54 m. the time of High-water; which because the Moon decreases, is in the Afternoon; but if it had been on the 8th day, when the Moon was 8 days old increasing in Light, would have been the same hour in the Morning.

To find the time of the Day and Night. Double the time Sun-setting, and it gives the length of the day; and double the time of Sun-rising, and it gives the length of the night.

IT is an old, but true saying, That the best of things are most corrupted, and among others, the most excellent, too much verified in this *Heavenly Art of Astrology*, and that not only by her *avowed and declared Enemies*; but also, by her pretended Friends and Favourites, who under the Colour of true Kindness, have done her more Mischief, than the most implacable Enemy could otherwise invent.

The *Exclamations* of the first, bespeaks not only real Prejudice, but want of true Knowledge in this Divine Art, and right reason also; and therefore more to be lamented, than heeded; for no one that hath been duly acquainted with its Purity, have been able justly to say any thing against it: and then it follows, that Reason must be wanting, where Hatred gives Abuse through meer Ignorance, or the idle Chimeras and Reports of others, wholly as senseless as themselves; but the others, either through pretence of true knowledge, or friendship, to have been the absolute and real Instruments that deform'd the sweet Countenance of that delicate Lady; and in Justice, are liable to answer for all the Abuses of the former.

Among the latter, there are two principal kinds: the one, a sort which swarm in most places, but chiefly in the City of London, by the name of *Astrologers*; who the better to introduce their Fraud, and smother their Ignorance, are not ashamed to assume the Title of *Conjurers*, pretend to command even the very Devil at pleasure, bring back *stolen Goods*, *Persons absent*, and the like, when and where desired, to give *Spells*, *Sigels*, *Lements*, and such like fopperies, to cause *Marriages*, *Love*, *Hatred*, *Riches*, *Valour*, and what not; and by *Horary Figures*, (without hearing the question) to resolve at once all things past, present, and to come, which are Principles *true Astrology* no ways owneth, and the very Instruments that have rendred this glorious Art so obnoxious and contemptible to its more apparent and publick Enemies; for tho' *Astrology* duly handled, is sufficient to give all reasonable Satisfaction; yet not when administred by such unjust hands and proceedings, but is a method far differing from, and above the Sphere of these Gentlemens *Practice and Knowledge*.

Days The second sort of these more obscure, but yet dangerous enemies to this heavenly Science, are such whose curious Gossoms blowing in a more aspiring Current, and wanting satisfaction

Story Fundamentals, or Reason, and Moderation, rightly to read them, have in vast Volumes innovated (instead of true *Astrology*) their own Imaginations, and conceited Inventions, which for the Eloquence or Learning of those Authors, and the want of like Learning, Industry, true Authors, and Courage of others to contradict, have like the *Romish Religion* so long passed as Orthodox, that it is at length almost become Heresy, *Luther-like*, to mention a Reformation, much more to endeavour it; however, not giving due satisfaction to others equally Ingenious, hath caused as various Opinions in this Learning, as Orders in the Church of *Rome*, and thereby rendered it so uncertain and intricate, that some modern Authors having quoted several Leaves, every one in the Dark, to accept what Rules they conceive best.

In Works of this Nature (which Astrologers call *Mundain Revolutions*), *Haly* and *Guido Bonatus*, (two of these Authors of great esteem among our Modern Astrologers) adviseth that if at the *Suns* entrance into *Aries*, the Sign ascending be fixed, that one Scheme erected for that time, should serve for the whole Year; if *common*, but half the year; but if *movable*, but one Quarter, and so new ones for the rest; and that Planet found Almuten of each Scheme, to be Lord of the Year, half, or Quarter; which with other like erroneous Opinions not answering the Predictions thereupon grounded, have rendred the verity of this Art doubtful, even to her Friends and real Favourers.

Ptolemy, (*Princeps Astrologorum*) Prince of Astrologers, *Lib. 2. Cap. 10.* and after him, *Originus* and others, direct three Schemes to be erected for every Quarter, that is, one for each Ingress of the *Sun* into the four Cardinal Points, and the other two for the New and Full Moon, next preceding and succeeding.

Rigel, *Aph. 23.* (proceeds yet nearer truth, where he) saith, *Fundamentum Principale in Revolutionibus Annorum Mundi est introitus Solis, in primum punctum Arietis, pro eo multa necessaria ad hanc inquisitionem sunt, & scientia multorum, Experimentorum, & Cognitionum, Superiorum, Preteritorum, Temporum, & magnarum Eclipsationum, &c. (i. e.)* That the principal Foundation for judging Revolutions of the Year of the World, is the *Suns* entrance into the first Point of *Aries*; yet many

Before I proceed to give Judgment on this Scheme, I must according to this Doctrine have respect to other preceding Matters, too tedious and copious for my narrow time and room; and therefore, I shall briefly mention here, some of what I conceive most material. And those are, 1. The Eclips of the Moon, the 19th of September last. 2dly, The two succeeding Oppositions of Saturn and Mars. 3dly, The Scheme of Sols Ingress into Capricorn, 1689.

The Eclips I have treated of in my Almanack for the last year; but for as much as that was published in Ireland, and therefore may be supposed to salute the hands of but few in England, to whose this may come; (except those never to be enough lamented, miserable, distressed Creatures, most inhumanely forced from their plentiful Beings in Ireland) and that some of its Effects, will begin this year; and as Barm to new Ale, gives ferment to the aforesaid Opposition and Ingress. I shall here present you with some Remarks I made thereon, respecting this time in the words therein Printed, and Written, in August, 1688. with many other things, too tedious to Enumerate here, which since have happen'd.

First, That as that Eclips began in the 9th, and ended in the 8th, it Threatens many of the chiefest Persons concerned in, and about matters and things Ecclesiastical, long Voyages, and Sea-Affairs, with removals into the other World; Disturbance, Trouble, and Loss in their Possessions, Traffick, Dealing, or other concerns, however directed.

Secondly, Falling in the fiery Triplicity, threatens the Destruction of Oxen and Sheep; to a Great King or Prince, Exile, Imprisonment, &c. between Potentates, and the common People, Grudges, mutual Hatred, Dissention, and such like Evils; and while Mars (as now) governs the place Eclipsed, there will be Quarrels and Wars between Men, and even their nearest Relations, Allies, Friends and Neighbours.

Thirdly, From the cross Configurations thereat, That was the Season proper, Europe might reasonably expect abundance of Wars, and bloody Effects, even this Winter; (meaning the beginning of this year) however (that) at the best, they threaten many cross Debates, Controversies, Lawsuits, Robberies, Duels, Murders, and such like Villanies; and as the Winter declines, and the two Infortunes accost each other (in Jan.), by their reiterated hateful Opposition;

Opposition; so Europe will grow more sensible of their apparent and bloody Effects.

How far these things have been in part confirm'd before the Commencement of this, I need not trouble my self, or Reader, with telling here; but conceive it not amiss to signify, that the remainder deeply respects the Kingdom of Ireland.

Perhaps some, that are no Friends to the present Government, considering this Eclipse to fall, as it doth, in the first part of *Aries*, may in Contradiction to this Opinion, affirm its Effects not so auspicious as they really are; but if so, I leave time to determine the matter. And for the present, further add out of the 11th page of my last years Almanack, *That King William will under the Effects of this Eclipse, instead of diminishing, enlarge his Honour, Fame, and Reputation, and that too with the length of his Sword, but not without diminution of his Treasure; for about this time (that is, the beginning of this year) he will be both Active, and more fortunate than ever; which if found to fail, will oblige me afterward the more willingly to abide their future Censures, and make Atonement for my Mistake.*

However, in the mean time, I would for a tryal of Skill at that Weapon be rightly understood, not to exempt either from the ungrateful returns of *Grumbletonians*, when the Kingdom swarms with their Treachery and Villany; to which I shall apply the Text, Prov. 14. 2. *That he that walketh in uprightness, feareth the Lord; but he that is perverse in his ways, despiseth him.* And then it is not to be admired they despise their King and Country also, that despise their God.

But it would be no less admirable at present, than the Wonder of future Ages, if some Persons, who had no other Refuge in time of Extremity, and greatest Danger, should instead of returning Thanks for their glorious Deliverance, study how to bring their blessed Deliverer into contempt, and also to ruin and betray the Bulwarks, both of his and their own Safety: But if any there are amongst us, whose business it is to act contrary, let them remember, *That the wicked is reserved to the day of Destruction; they shall be brought forth to the day of Wrath, Job 21. 30.* And that I tell them, that

An Astrological Judgment on the Year 1690.

that without timely Repentance and Reformation, such will their Portion be; and this too, when the *French Hector* will not be able to relieve them. For as I observed page 17. of my last years Almanack, his present Directions and Revolutions most severely threatens that mighty Monarch with Affliction both of Body and Mind, decny of Honour, Substance, Health, and vital Breath; and his Dominions with Invasion, Incurfions, and Rapine of Enemies, Scarcity, and domestick Divisions, before the year 1690. be expired.

I will not absolutely affirm him to dye this year; but I am certain, if not, he cannot live long; and had almost as good be Dead, as live in his Condition.

The Oppositions of *Saturn* and *Mars*, are allowed by all *Astrologers*, to be none of the best of Aspects; but much more, when reiterated, as now three times in less then five Months time, all three concerning poor *Ireland*.

At the *Winter Ingress*, and *Lunation* preceding, all the Planets but two, were under the Earth, and *Luna* at the first, in the seventh, separating from a *Trine* of *Mercury*, and hasting to a *Conjunction* of *Mars*, shews many secret Debates, and great Preparations for warlike Enterprises in the Months of *January* and *February*.

In the *Vernal Scheme*, and the *Lunations* preceding, and succeeding, most of the Planets are under the Earth, and in two of them, *Saturn* is in the *Ascendant*; in the other, in the 11th *Retrograde*; but in all, in *Trine* to *Jupiter*, *Mercury*, and *Venus*, and in the preventional *Lunation* to *Sol*, and *Luna* also; which shews Matters to be kept very Secret, and intended for the Composing the present Distractions of Nations, and particular Persons and Families. But *Saturn* being an Infortune by Nature, *Retrograde* in *Square* to the place of the great *Conjunction*, and in the *Vernal Figure*, separating from that *Trine* Aspect, and in *Mundane Parallel* with *Jupiter* and *Mercury*; and both then, and at the following *Lunation* (which is an *Eclips* of the *Moon*, and so much the worse) in *Parallel* of *Declination* also; and at the preventional *Lunation*, in *Parallel* of *Declination* to *Jupiter*, *Venus*, *Sol*, and *Luna*, seems to turn all those sweet Promises into most violent, corrosive Mischiefs; and those too principally, to the *French King*, and his Dominions, who of all other Princes and Places in *Christendom*,

are

are the most severely pointed at, by the Mischiefs of this year; so that it seems miraculous he should Survive it, or at best, escape inevitable Ruin, when even his own Subjects tired with his Tyranny, are ready to lay hold of any thing that may seem to afford them the least grain of Relief; and will not even in this Year be wanting upon all Occasions, as opportunity shall give leave, to hazard their Lives, and whole Fortunes, to retrieve themselves from their so long miserable Condition.

Saturn at the preventional *Lunation*, and *Eclips* of the *Ascendant*, shews the common People afflicted with Doubts, Fears, and Jealousies; and with the aforementioned *Parallel*, that they will Murmur, and repine at their Superiors, if not thereby incur their highest Displeasure also; but the *Virgins Spick* culminating at the *Ingress*, and *Cor Leonis* at both *Lunations* with the *Conjunctions* of *Sol*, *Venus*, *Jupiter*, and *Mercury*, in each of them, will much advance the Glory and Honour of Kings, Princes, and Nobility in general, and those of Their present Majesties of Great Britain in particular, and extend their Arms to the Correction of their most Potent and Implacable Enemies, and enlarge their Dominions, Maugre all the malicious Intrigues of those Sortish Animals, that endeavour the contrary, as vainly, as idly, and ungratefully; and with the *Square* of *Mars*, to the *Plotting Conjunction* of *Jupiter*, *Sol*, *Venus*, and *Mercury*, and other Testimonies, which for want of room are here omitted, will lay open all the most Secret Mischiefs and Contrivances, against their Persons, and Auspicious Government, and bring the Offenders to Punishment; yea, even those Snakes that lurk in their Bosoms, under pretence of Friendship to suck their Blood; and therefore, let those thus concerned, hereby take timely warning, that they do not, when otherwise too late, curse their Stars, that gives them this seasonable Advice.

Astrologers say, That *Mars* in *Square* to *Mercury* alone, signifies *Plotting*, *Theft*, *Fraud*, *Deceit*, *Perjury*, *Forgeries*, *Spreading* of *Scurrilous Libels*, and such like Villany to super-abound; but as he is here at the two *Lunations* in the 8th, and at the *Ingress* on the Cusp of the 7th, and in *Conjunction* with *Aldibaran*, a most violent fixed Star, and in *Square* to *Jupiter*, *Sol*, and *Venus* also; he likewise threatens great Mortalities and

Destruction among human kind, both by *War* and *Sickness*, *Fire* and *Sword*, *Rapines*, *Murthers*, and all manner of violent mischiefs; *Scarcity*, and want of *Fish*, *Fowl*, and the *Fruits* of the *Earth*.

Luna at the *Ingress* strong in *Cancer*, her own *House*, separating from a *Trine* of *Venus*, and applying to a *Trine* of *Sol*, and at the *Eclipse* to a *Trine* of *Mars*, seems to befriend most places under that *Sign*; but *Scotland* and *Holland* in particular, with more satisfactory Success, *Unity*, and advantageous *Proceedings* than last year, more especially in their *Naval* and *Warlike* Undertakings, *Councils*, and *Government* in general; and is further confirm'd by the *Conjunction* of *Venus* and *Mercury* in *Cancer* at the *Summer-Ingress*: But the *Square* of *Sol* and *Jupiter*, and of *Mars* and *Saturn*, shews some *Firebrands* both there and in *England* also, scattering *Coals* of *Confusion*, even to their own *Destruction*: And with the aforementioned *Square* of *Mars* and *Mercury*, great *Engagements*, *Slaughters*, *Robbing*, and *mischief* at *Sea*, both by *Storms*, and the common *Effects* of *Wars*; some new modelling *Controversies*, or more than ordinary *Disputes* or *Regulations* in and about things *Maritime* and *Ecclesiastical*, and great *changing* and *chopping* such as are concerned therein.

Now, you late *Great* and *Mighty Rulers* and *Ruiners* of *Ireland*, what do you think of your selves now? Pray consider whether it was for telling *Truth* or *Lies* you vouchsaf'd me your *Courtesie* in *November 1688*? Turn about, is fair play: It was your turn to ask *Questions* then; pray vouchsafe me the favour now to be answered, Whether you think my asserting Him you impudently then call'd *Rebel*, but now, against your wills, is your lawful *Sovereign*, was landed in *England*, freely received into *Exeter*, and making his way towards *London*, courted and kindly received by the *People*; and that you design'd to disarm the *Protestants*, as you did the latter-end of *February* following: I say, I desire to be answered, Whether I told truth? And if so, Why I was sentenced to be punished, as I unjustly was? Pray excuse my brevity now, and I will not fail in my next to vouchsafe you more room: In the interim, think not amiss that You and the rest of your *Crew*, receive the same measure you gave; for both your *Heathensh* and *Christian Turkish* Friends, are forc'd now to fail you; the fate of the last, I mean

An Astrological Judgment on the Year 1690.

mean the *French Turk*, I have herein before told you; and here do assure you, That of the Other will not be much better, but in all cases ruinous and miserable; perhaps he may command *Poland*; but the *Moscovite*, *Emperour* and *Venetians* may him withdraw his Horns confoundedly. *Denmark*, have care of *French Poyson*, secure your Friendship with *Sweden* together with the Confederates, and be both happy.

ECLIPSES, 1690.

THere will be this year four *Eclipses*: The first of the *Sun* *February* the 20th, invisible; the second of the *Moon* on *Friday* the 14th of *March*, in its greatest darkness 14 minutes past 10 at night; near six digits will be visibly obscured from those of *England*, *Scotland*, and *Ireland*; The third will be of the *Sun*, *August* the 24th, about Three in the morning invisible to us; The fourth will be of the *Moon*, the 8th of *September*, invisible also.

F I N I S.

Advertisement.

THere is now in the Press, and will be finished in six months, a Book entituled, *Cursus Mathematicus*; the *Mathematical Sciences* methodically disposed in such order as they ought to be Read and Practised by such as would attain to a competent proficiency in them: in Nine Books. By *William Leybourn*, *Philomathemat.* The Proposals, with an Analysis of the whole Work, is to be had at several Booksellers in London and in the Countrey. The Price to Subscribers will be 20s. in Quires.
